Summary

A self-driven and motivated Computer Science student skilled in software product testing, development and implementation of new platforms as well as experience providing IT support and assistance to colleagues. I look to apply my analytical skills, ability to work in team environments and strong attention to detail to a software development internship in a leading technology company.

Skills

- Java, Python, HTML, CSS, JS, PHP.
- Object-Oriented Code writing.
- ASE, Sabre, Steam, Dyn-MRO.

- Logic planning, System testing.
- Tri-Lingual Dari, Pashtu, English.

Experience

Renton Technical College

Teacher's Assistant (Application Development)   May 2021 to present
- Developed, planned, and prepared programming activities for students learning Java OOP (Android Development).
- Engaged students with diverse teaching strategies, hands-on activities and technology-based approaches.
- Improved performance of struggling students using personalized mentoring and tutoring.

Auto Service Programmer

Compass Point Auto, Auburn, WA   January 2017 to Present
- Install, Calibrate, and program Control modules for different components of modern automobiles.
- Verified secure installation and proper function of systems and components through direct testing.
- Use skills learned through school programs to create networks, install work-related software for module programming, maintain office computers, and other IT-related duties.

Meineke Renton, WA

Auto Technician   August 2015 to January 2017
- Diagnosed and repaired engine, transmission, electrical, steering, suspension, and brake system problems.
- Adhered to all OSHA safety regulations related to workshop operation and safety.
